## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 27, 2005 has been entered.

### ***Response to Amendment***

2. Applicants' amendment filed January 27, 2005, has been entered and made of record.

### ***Specification***

3. The disclosure is objected to because of the following informalities:

In Page 2, Line 10, U.S. Patent Application Serial Number should be included. Furthermore, in cases that an application has been patented, U.S. Patent No. should be also included.

4. The specification disclosure should be amended to include applicable portion of U.S. Applications referred to for the support of the claimed invention (Portions referred to in the remarks filed on January 27, 2005).

Appropriate correction is required.

### ***Claim Objections***

5. Claims 75 and 76 are objected to because of the following informalities:

Art Unit: 2623

In Line 2 of Claim 75 and Line 1 of Claim 76, "claims 67-74" should be corrected to "claims 68-74".

Appropriate correction is required.

6. In Lines 1-2 of Claims 75, 78 and 81, "containing software for performing" should be corrected to "storing a software that when executed by a computer performs" in order to properly claim patentable subject matters.

***Claim Rejections - 35 USC § 112***

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claim 76 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 76 recites a device adapted to perform the method of Claim 75. However, Claim 75 is directed to a computer-readable medium.

***Double Patenting***

9. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA

Art Unit: 2623

1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

10. Claim 69 is provisionally rejected under the judicially created doctrine of double patenting over allowed Claims 14 and 15 of copending Application No. 09/409,260 (Now allowed). This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows:

The instant application claim 69 limitations encompass all limitations of Claims 14 and 15 of the co-pending Application 09/409,260 (Now allowed).

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other

Art Unit: 2623

copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

***Allowable Subject Matter***

11. Claims 69-73 would be allowable by submitting a timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) to overcome nonstatutory double patenting rejection set forth in the office Action.

12. Claim 76 would be allowable if rewritten to overcome 112 second paragraph rejection and claim objection set forth in the office Action.

13. Claims 75 and 77-82 would be allowable if rewritten to overcome Claim objections set forth in the office Action.

14. Claims 68 and 74 are allowed.
